
```
%%Automation for LTSPice
% raw_data=LTautomation(file_name)
%
% This function will execute a LTSpice XVII run it and return a struct
containing
% all signals in the simulation
```

Parameters

- @param **file_name** Name of .asc file to be executed
- @retval **raw_data** Returns the struct with all the signals

Code

```
function raw_data=LTautomation(file_name)
    addpath(' ../../utilities');
    repo_path='C:\Users\johnc\Dropbox\TFM\source\MIF3\';
    sim_path=[repo_path 'sim\'];
    batch_path=[repo_path 'utilities\']; %Because fucking space in
Program Files
    cmd =[batch_path 'spice.bat' ' ' sim_path file_name];
    system(cmd);
    len=length(file_name);
    file_name(len-3:len)='.raw'; %Searches the .raw file generated
    raw_data=LTspice2Matlab([sim_path file_name]);%Imports all the data
```
